This directory was first published in November 1994 with funding from the Groundwater Education in Michigan (GEM) Program of the W.K. Kellogg Foundation. The original directory was compiled by undergraduate researcher Charles Hoffman under the guidance of GEM Center Director Neil Hutzler, PhD, PE, and Coordinator Kristine Bradof. This directory contains information updated by the participating consulting firms in early 1999. Community and regional resources were also updated in 1999 by Kristine Bradof and undergraduate assistant Glen Spangler. Listing of a firm does not imply endorsement by the GEM Center. Additional copies of this directory may be downloaded from the Center's Web site, http://emmap.mtu.edu/gem/.

Michigan Technological University is an equal opportunity educational institution / equal opportunity employer.
